

Parking – Pitchings

At a recent meeting of the parking Working Group it was agreed that planters could be used to prevent cars double parking by accessing the pavement to the rear of the pitching's.

The Chairman has proposed that a memorial planter is the centrepiece of the area as below:

Sodbury Town Council

1926 - 2022

In memory of Her Majesty Queen Elizabeth II

The planter is produced by David Ogilvie Engineering (same as town planters) and is 1200 x 600 x 930mm in galvanized steel black with gold banding and lettering. The cost of the planter with design on a stainless-steel plaque is £1,542 net. The cost with the design in vinyl graphics is £1,352. Both quotes include a delivery charge of £105.

The remaining areas can be filled using cheaper planters – choices are below:

1500 x 500 x 750 mm by Amberol at a cost of £423.89 each and £140 delivery (these are the same as in Hatheralls Yard in plastic)

1500 x 500 x 600 mm by Broxap at a cost of £488 each delivery TBA (these are made of steel similar to current planters)

1200 x 500 x 700 mm by geViews at a cost of £172.50 each delivery £50 – minimum order of 5 (we have no examples of these – they are plastic)

Estimate = 6 planters required in addition to the memorial planter

HIGH STREET
